Problem

User problem: Many Yelp users are unaware of the Yelp Elite Squad program. While some are contacted manually by Community Managers (CMs), OCAs, and CAs via DMs and compliments, this outreach is not scalable and may miss high-potential users. Without a consistent in-app awareness mechanism, users may never learn about the program or understand how to qualify.

Biz problem: We are underutilizing a large pool of potential Elite candidates. There is a clear gap in awareness and conversion. Increasing visibility of the program could drive more nominations and higher-quality contributions as users aim to aspire to join the Yelp Elite Squad, but also as Elites once in the squad.

Main metrics

The main KPI that the team is focused on here would be reviews from users who go from potential Elites to finally added to the squad. In order to get that, we would also see increases in CTR to the Elite Squad page from eligible users and incremental nominations from modal-exposed users.

Opp sizing

- ~880K reviewers annually (est. between 7/24 and 6/25) that meet the above criteria (~2.9M unique impression opportunities where those users wrote a review during that year and met the criteria)
- For the cases of this first send, we would limit to one per user
- 3% - 20% CTR from each impression
- previous 11% on a recognitions modal that asked users to write another review
- 25% of users that hit the Elite site nominate themselves
- 13% of users that aren't Elite-ready become an Elite w/in 90D of their auto-rejection nominations
- Total # of Elites: 1K - 5.8K incremental Elites per year
- 10 reviews per Elite
- Total incremental number of reviews annually: 10K - 58K annually

iOS Proposed designs

Figma

[Design proposal]

Show eligible contributors a modal of Yelp Elite Squad program in the post review screen

Targeted user group

- 2+ reviews in the last 30 days
- 6+ lifetime reviews
- Not currently Elite
- Not ineligible
- Not nominated in the last 3 months

Modal appearing logic:

- Modal must not interfere with other high-priority modals
- Must respect frequency caps (1x per 180 days)
- Must only show to eligible users based on contribution criteria
- Modal should appear after the top section animation, if there is any
