Lead product designer

Specializing in contributor ecosystems and UGC engagement. 4+ years designing for Yelp's consumer contribution systems: from new user activation to long-term contributor retention.

Work Experience

Yelp

Lead product designer

2022 - now

Consumer Contribution

Designed the contributor lifecycle system: lowering the barrier to first contribution, building engagement habits, and recognizing power contributors to drive a self-sustaining growth loop.

Lightweight Contribution & Engagement

- Led **Community Q&A** from 0 to 1: a new type of contribution outside reviews, 10% of the feature users are non-contributors (non-contributor activation).

Contributor Recognition & Retention

- Redesigned the **contributor profile (Me Tab, WWW)** as the unified home for recognition progress, contribution history, and Q&A activity
- Established the **recognition system**: badges & acknowledgements, having an increase of 4.6K reviews/month.
- Improved the **biz owner-to-contributor appreciation** flows, creating a two-sided recognition loop that increased contributor motivation, metrics WIP.
- Curated **Year on Yelp**, a personalized annual summary celebrating contributor impact
- Revamped the Elite ecosystem, from awareness to nomination experience, increasing the overall Elite nomination by approx. 5%.

Doc.ai

Product designer

2021 - 2022

SaaS Product

Designed and shipped Smart Omix, a 0-to-1 SaaS web app advancing clinical research.

- Defined user journeys, built site architecture and user flows, and delivered V1.0
- Led cross-team conversations with product, engineering, clinical, and sales

System design

Initiate and maintain the **Design System** and **SaaS Design Guide** for all the Web products in Doc.ai
